

Early Case Analytics

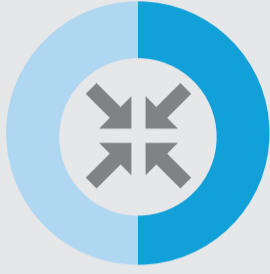

ESI Identification & Culling

We help you cull non-relevant documents prior to attorney review – this results in significant discovery cost savings

Typically - companies reduce ESI only

50%

before going to counsel for processing and review

For example, in a case involving **500GB** of company e-mail and documents reduced to only about **250GB**

using standard metadata, such as date, email address and file type

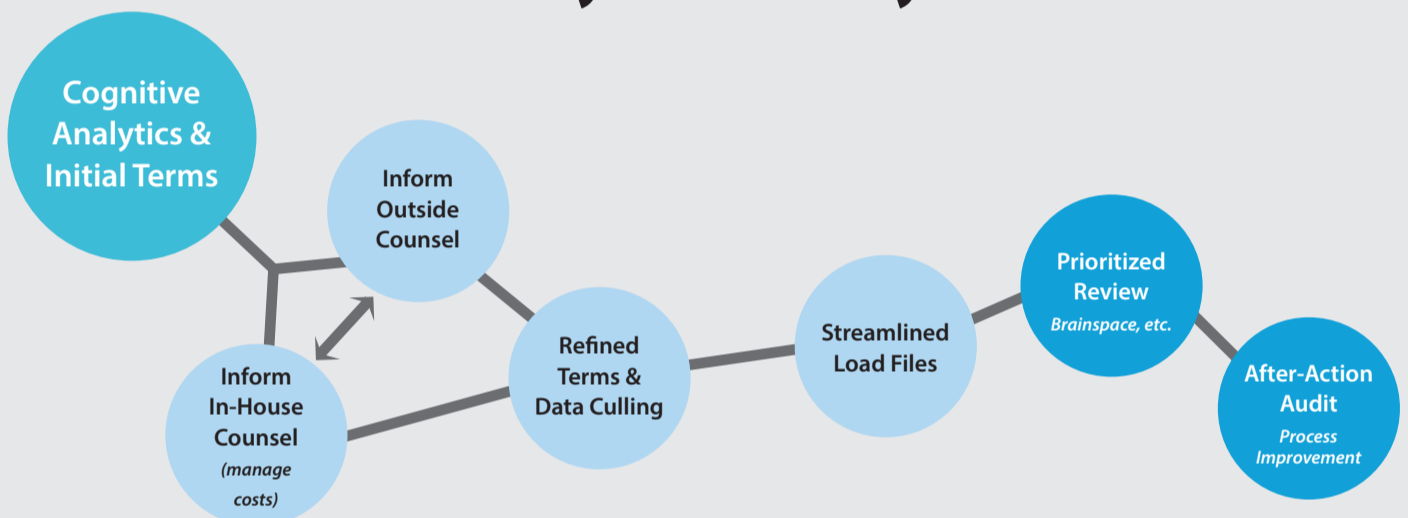

250GB

Will be sent to outside counsel. This includes 10s of thousands of non-relevant documents.

THIS IS INEFFICIENT AND EXPENSIVE!

The more non-relevant documents you send to outside counsel, the more expensive litigation will be.

The Solution: Early Case Analytics

Recent Case Study: Patent Litigation

Without Early Case Analytics

230,098

With Early Case Analytics

22,872

of docs put into review

80-90%

ESI Reduction

Intelligent use of early analytics tools can reduce the initially-collected files by 80-90% before going to the final review platform, often by more.

This is an **80-90%** Discovery Cost Savings

99%

Cull up to 99% of ESI before it goes out the door

50%

Up to 50% lower processing & hosting fees

90%

Up to 90% lower attorney document fees
